TEP EE Plan, ACC #E-01933A-15-0178

RECEIVED

Dear Chairman Little and Commissioners-

2016 FEB -2 A 9: 25

Please approve all of the TEP Energy Efficiency measures recommended by staff as set forth in the Proposed Order with one exception: please deny the request for a waiver and increase the budget amounts for their programs to meet the 2016 12% EE requirement of AAC R14-2-2404.

I would suggest that the budget increases come in the following programs: Existing Homes; Low-Income Weatherization; Multi-family; and Home Energy Reports.

Tucson has a large stock of older poorly insulated homes that will be with us for a long time whose owners could use a boost to better insulate them. Poor people need help with this and with better insulated apartments in multi-family housing units.

All of these programs also create local jobs, reduce air pollution from power plants and make Tucson more livable.

Please support the recommendations from staff, but go beyond them to assure more EE improvements are made for Tucsonans.
